Invariant Probabilities of Markov-Feller Operators and Their Supports

Radu Zaharopol

Invariant Probabilities of Markov-Feller Operators and Their Supports

In this book, invariant measures are discussed for a large class of discrete-time homogeneous Markov-Feller processes. The book is centered on the theory of invariant measures for Markov processes and their applications to function systems.

Chapter 1: Introduction

Chapter 2: Basic Concepts

Chapter 3: Markov-Feller Operators and Their Supports

Chapter 4: Invariant Probabilities

Chapter 5: Applications

Chapter 6: Further Topics
